2. ABOUT RANKING SYSTEM

GENERAL INFORMATION ABOUT THE RANKING SYSTEM

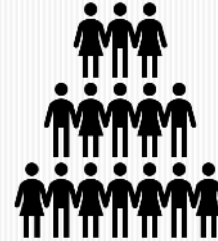

- ❑ The WPC has developed a unique ranking system that identifies the best teams of each member of the community, to build a transparent and harmonized system for determining GotF and GotF qualifier participants
- ❑ The ranking system is harmonious and includes not only sports metrics, but also marketing metrics, and the final score of a team is influenced by the level of the tournament in which it participates (WPC member ranking). This mechanism is designed to popularize and develop phygital sport in those countries where tournaments are held
- ❑ For the season 24/25 WPC has laid down the possibility for members of the community to organize a full qualifying cycle with Regional Qualifications and National Tournaments, or to organize it in a «truncated» format with National Tournaments only
- ❑ The ranking system unifies the requirements for the format and number of Regional Qualifications and National Tournaments
- ❑ **The key to successful tournaments is to immerse yourself in the WPC regulations!**
